

360 HOSTING & SALES SUPPORT

Our Hosting and Support service is highly recommended and remains optional for each project. It brings faster performance & longer return on investment with best-in-class website integration and broader marketing support.

- Customisable URLs for best practice integration in website pages & for sales proposals [URLS INTRO VIDEO](#)
- Technical updates, editing, re-branding, extra re-touching, adding / removing material or 360° photos.
- Offline Access to the eyeNAV Presentation App for your sales team / sales trips [APP INTRO VIDEO](#)
- Showcasing your hotel in the eyeNAV VIP Portfolio & App to support exposure and direct bookings

About eyeNAV 360 Tour Hosting

At eyeNAV, we don't just create world-class virtual tours – we deliver them through robust hosting which ensures reliability, powered by cutting-edge infrastructure providing a seamless, immersive experience from any country the user is accessing the content from. With global content delivery networks (CDNs) and optimised performance protocols, eyeNAV 360 Tours reach users across continents with the same speed and quality so potential guests enjoy instant, high-definition visuals without delays or downtime.

When we host our client's 360° presentations, we are able to maintain these as future-proof visual assets which evolve with your property & business needs.

eyeNAV 360 hosting means faster, smarter, and more customisable. We can host multiple, room type or venue - specific 360 URLs for best practice website integration and supporting event sales proposals.

Our Support Service Package – Increasing ROI

Our clients have the option to self-host their finalised 360° Tour however this content is more complex to maintain than a YouTube video and does require high-speed delivery and occasional software updates to ensure a great user-experience. Maintaining compatibility on new devices and improved performance of our virtual tours over the years has proven the value of our Hosting but even more relevant to our clients is being able to include free editing with this service.

The majority of our 360° presentations are used on websites and presented on iPads at point of Sale. These productions can be re-branded, re-built, captions edited, scenes added or removed countless times to accommodate the evolving brands and sales activities of these hotel teams. This versatility truly positions our work as a long-term 'visual asset' rather than 'set & forget' visual content.

offers the following key advantages;

Empowering Seamless Presentation Experiences

Face-to-face & Point of Sale opportunities are still a major part of our client's marketing Mix.

To boost the value and support to our Hosting Package, we include our Offline enabled App for iOS & Android. We developed our APP as a unique solution for seamless 360° Tour presenting on iPad & mobile devices without needing a browser or internet connection.

Install our APP and contact us for a Presentation ID if you'd like to try this functionality on your own device.
